## GY-906 Infrarød temperatursensor

Produktkode: 520 Tilgjengelighet: 1

Pris: kr. 170,00

## **Short Description**

MLX90614ESF GY-906 Infrared Contactless Thermometer Module IR Sensor For Arduino

## Beskrivelse

Features and Benefits:

Up for sale is a MELEXIS MLX90614ESF-BAA-000-TU-ND non-contact infrared thermometer for use with Arduino,

or any microcontroller that can communicate with it through it's I2C interface.

This sensor comes with a breakout board with all of the components needed for operation and two types of pins.

They are unsoldered. Please indicate if you would like one or the other soldered.

There are two solder jumpers for the I2C interface that may or may not need to be soldered depending on your application,

but will not for most uses.

Small size, low cost Mounted on a breakout board with two types of pins 10k Pull up resistors for the I2C interface with optional solder jumpers Easy to integrate Factory calibrated in wide temperature range: -40...+125°C for sensor temperature and -70...+380°C for object temperature. High accuracy of 0.5°C over wide temperaturerange

(0...+50°C for both Ta and To) High (medical) accuracy calibration Measurement resolution of 0.02°C Single and dual zone versions SMBus compatible digital interface Customizable PWM output for continuousreading Simple adaptation for 8...16V applications Sleep mode for reduced power consumption Different package options for applications and measurements versatility Automotive grade

Applications Examples:

High precision non-contact temperaturemeasurements

Thermal Comfort sensor for Mobile AirConditioning control system

Temperature sensing element for residential,

commercial and industrial building airconditioning Windshield defogging

Automotive blind angle detection

Industrial temperature control of moving parts

Temperature control in printers and copiers

Home appliances with temperature control

Healthcare

Livestock monitoring

Movement detection

Multiple zone temperature control – up to 127sensors can be read via common 2 wires

Thermal relay / alert

Body temperature measurement

1 x MLX90614ESF GY-906 Infrared Contactless Thermometer Module IR Sensor For Arduino
