

# Waterproof DS18B20 Temperature Temp Sensor Digital Thermal Probe

**Produktkode:** 803

**Tilgjengelighet:** 4

**Pris:** kr. 55,00

## Short Description

Waterproof DS18B20 Temperature Temp Sensor Digital Thermal Probe 1M For Arduino

## Beskrivelse

1.Brand New High Quality

2.The probe the temperature sensor DS18B20 original chip

3.High quality stainless steel tube encapsulation waterproof moistureproof prevent rust

4.Stainless steel shell 6\*50mm

5.Power supply range: 3.0V to 5.5V

6.Operating temperature range: -55°C to +125°C (-67°F to +257°F)

7.Storage temperature range: -55°C to +125°C (-67°F to +257°F)

8.Accuracy over the range of -10°C to +85°C: ±0.5°C.

9.No other components, unique single bus interface

10.Output lead: red (VCC), yellow(DATA) , black(GND)

11.Cable length: 100 cm

## Package Included:

1 x Waterproof DS18B20 Temperature Temp Sensor Digital Thermal Probe For Arduino
